Chemistry has now really diversified, with new breakthroughs enriching the subject once and for all. Its branches now encompass various fields, starting from spectroscopy to sonochemistry, nano chemistry, supramolecular chemistry, green chemistry, environmental chemistry, solid state chemistry, bio-inorganic chemistry, geo chemistry, ocean chemistry, flow chemistry, stereochemistry, catalysis chemistry, forensic chemistry, photochemistry, femtochemistry, quantum chemistry, computational chemistry, surface chemistry, neurochemistry, cluster chemistry, polymer chemistry, nuclear chemistry, cosmo chemistry and so on, with the list never ending and pivoting the subject to new levels of excellence and enrichment. In this webinar our endeavour would be strictly focussed to bring forward some of the advances incurred in some of the traditional as well as the non-traditional branches of the subject.
