The Department of Urdu province is very bad, it is not given priority in our college, this Department is weak from all sides, no facilities are provided.

There are many tasks in college that make students anxious.

- 1) In spite of going online, one has to stand in long queues for exam fee and registration fee etc.
- 2) The whole system of the library is bad and the servants of the library have no manners to speak, they consider the students as slaves and do nothing about their work, they only take the salary of the harem.
- 3) All the servants of the college are very ill-tempered and treat the students as slaves in every work.

Observations and Suggestions to Improve Bidhan Chandra College, Asansol, 2022-23:

1. Enhancing Teaching Quality: One observation is that there is a perceived lack of dedicated and knowledgeable teachers in the

college. To improve this, the college administration could focus on hiring highly qualified faculty members who are passionate about teaching. Conducting regular workshops and training sessions for the faculty to upgrade their skills and keeping them updated with the latest advancements in their respective fields would greatly benefit the students. Additionally, creating a feedback mechanism where students can provide anonymous feedback about their learning experiences could help identify areas of improvement and enable the college to take necessary actions.

2. Student Engagement and Involvement: Another observation is that the students do not feel satisfied with the level of engagement and involvement within the college. To address this, the college could establish student clubs and societies, encouraging students to participate in extracurricular activities and community service. These clubs could cover a wide range of interests such as sports, arts, entrepreneurship, social work, etc. Organizing events, competitions, and cultural festivals would help foster a sense of belonging and create opportunities for students to showcase their talents. Additionally, providing platforms for open dialogue and communication between students and college administration could enable the students to voice their concerns and actively contribute to decision-making processes.

3. Infrastructure and Resources: One more observation is that the college might be lacking in terms of infrastructure and resources. It is important for the college to invest in modern facilities, well-equipped classrooms, laboratories, and libraries that cater to the academic needs of the students. Furthermore, improving the college's digital infrastructure by providing reliable internet connectivity and access to e-learning resources would facilitate a more effective learning environment. Regular maintenance of facilities and a clean, safe campus would also contribute to the overall student experience.

By implementing these suggestions, Bidhan Chandra College can work towards enhancing the quality of education, increasing student engagement, and improving the overall college experience for its students. It is essential for the college administration to actively involve students in the development process, as their feedback and suggestions are crucial in shaping a better future for the institution.
